

## Kiwan Maeng

---

CONTACT INFORMATION	CIC 4th floor Carnegie Mellon University 4720 Forbes Avenue Pittsburgh, PA 15213	Homepage: <a href="https://kiwanmaeng.com">https://kiwanmaeng.com</a> Email: <a href="mailto:kmaeng@andrew.cmu.edu">kmaeng@andrew.cmu.edu</a>
RESEARCH INTERESTS	My research interests lie in <i>co-designing different system layers for low-power embedded devices</i> , primarily focusing on batteryless energy-harvesting devices. I designed compilers, programming models, hardware, and software for batteryless devices with frequent failures [2,3,5–8]. Experiences with failure-frequent batteryless devices also led me in designing an efficient fault-tolerant system for distributed recommendation model training [1].  <i>Research Area:</i> Embedded Systems, Compilers, Low-power Devices, Energy-harvesting Devices, Systems for Machine Learning (SysML)	
EDUCATION	<b>Carnegie Mellon University</b> , Pittsburgh, PA Ph.D. in Electrical and Computer Engineering - Advisor: Prof. Brandon Lucia  <b>Seoul National University</b> , Seoul, Korea B.S. in Electrical and Computer Engineering <i>Graduated with Summa Cum Laude</i> (GPA: 4.14/4.30)	Aug 2016 –    Aug 2016
AWARDS & HONORS	<b>Korea Foundation for Advanced Studies Scholarship</b> , KFAS <b>Summa Cum Laude</b> , Seoul National University <b>National Scholarship for Science &amp; Engineering</b> , KOSAF	2016 – 2021 Aug 2016 2010 – 2016
REFERRED PAPERS	<ul style="list-style-type: none"><li>[1] CPR: Understanding and Improving Failure Tolerant Training for Deep Learning Recommendation with Partial Recovery <a href="#">Kiwan Maeng</a>, Shivam Bharuka, Isabel Gao, Mark C. Jeffrey, Vikram Saraph, Bor-Yiing Su, Caroline Trippel, Jiyan Yang, Mike Rabbat, Brandon Lucia, and Carole-Jean Wu <b>Under review</b></li><li>[2] Adaptive Low-overhead Scheduling for Periodic and Reactive Intermittent Execution <a href="#">Kiwan Maeng</a> and Brandon Lucia <b>PLDI 2020</b> - Programming Language Design and Implementation</li><li>[3] Dynamic Task-based Intermittent Execution for Energy-harvesting Devices Amjad Yousef Majid, Carlo Delle Donne, <a href="#">Kiwan Maeng</a>, Alexei Colin, Kasim Sinan Yildirim, Brandon Lucia, and Przemysław Pawełczak <b>TOSN 2020</b> - ACM Transactions on Sensor Networks</li><li>[4] Enhancing Stratospheric Weather Analysis and Forecasts by Deploying Sensors from a Weather Balloon <a href="#">Kiwan Maeng</a>, Iskender Kushan, Brandon Lucia, and Ashish Kapoor <b>NeurIPS 2019 Workshop (spotlight talk)</b> - Conference on Neural Information Processing Systems</li><li>[5] Supporting Peripherals in Intermittent Systems with Just-In-Time Checkpoints <a href="#">Kiwan Maeng</a> and Brandon Lucia <b>PLDI 2019</b> - Programming Language Design and Implementation</li><li>[6] Adaptive Dynamic Checkpointing for Safe Efficient Intermittent Computing <a href="#">Kiwan Maeng</a> and Brandon Lucia <b>OSDI 2018</b> - USENIX Symposium on Operating Systems Design and Implementation</li></ul>	

	<p>[7] Alpaca: Intermittent Execution without Checkpoints  <u>Kiwan Maeng</u>, Alexei Colin and Brandon Lucia  <b>OOPSLA 2017</b> - Object-Oriented Programming, Systems, Languages &amp; Applications</p> <p>[8] Intermittent Computing: Challenges and Opportunities  Brandon Lucia, Vignesh Balaji, Alexei Colin, <u>Kiwan Maeng</u>, and Emily Ruppel  <b>SNAPL 2017</b></p>
OTHER PAPERS	<p>[9] The Midnight Engineers (Book, Korean)  <u>Kiwan Maeng</u>  Science comicbook for non-majors (<a href="#">LINK</a>).  Won several awards including <i>10 Authors of the Year 2017</i>.</p>
TEACHING EXPERIENCE	<p><b>Teaching Assistant</b>, Carnegie Mellon University <span style="float: right;">Spring 2020</span>  For 15-745, <i>Optimizing Compilers</i> with Prof. Todd C. Mowry  • Tasks: Designed homeworks and delivered lectures on the LLVM framework for graduate level compiler class.</p> <p><b>Hackathon Mentor</b>, Carnegie Mellon University <span style="float: right;">October 2019</span>  As part of <i>OurCS</i>, CMU’s educational outreach program for undergraduate women in CS  • Tasks: Designed and mentored a hackathon project for building batteryless board game.</p> <p><b>Tutorial Organizer</b>, MICRO <span style="float: right;">October 2018</span>  Organizer for a tutorial, <i>Getting Started with Intermittent Computing</i>  • Tasks: Designed and ran a full-day tutorial where 60+ participants learned the basics of intermittent computing with hands-on experiences.</p>
WORK EXPERIENCE	<p><b>Facebook AI Research SysML Team</b>, Boston, MA <span style="float: right;">May – Aug 2020</span>  Research Scientist Intern with Prof. Carole-Jean Wu  • Tasks: Improving efficiency in large-scale distributed recommendation model training in the presence of frequent machine failures [1].</p> <p><b>Microsoft Research</b>, Seattle, WA <span style="float: right;">May – Aug 2019</span>  Research Scientist Intern with Ashish Kapoor  • Tasks: Developing a hardware system and a machine learning algorithm for improving the precision of the weather forecast [4].</p> <p><b>Carnegie Mellon University</b>, Pittsburgh, PA <span style="float: right;">Sep 2016 –</span>  Research Assistant with Prof. Brandon Lucia  • Tasks: Developing systems for batteryless energy-harvesting devices [2,3,5–8].</p>
